Education

Bina Nusantara University – Alam Sutera Campus

Computer Science: 3.57

Streaming: Intelligent Systems

South Tangerang, Banten

Expected Graduation: 2027

Experiences

Faculty of Computer Science

South Tangerang, Banten

PT. Dapur Sehat Indonesia (Healthy Go)

Feb 2026 – Present

Jakarta, Indonesia IT Developer Intern

- Engineered scalable web applications and robust internal administrative systems using React and Laravel to support core business operations.
- Implemented secure API integrations and optimized frontend asset delivery, significantly improving overall UI/UX performance.
- Executed rigorous quality assurance and system validations to maintain highly secure and reliable administrative tools.

GMS Church - Alam Sutera

Feb 2025 – Present

Tangerang, Indonesia Connect Group Co-Leader & Data Ministry

- Assisted the Data Ministry by managing participation records and securely onboarding new visitors to maintain accurate database records.
- Facilitated weekly group sessions and guided discussions, demonstrating strong interpersonal communication and community leadership.

Pancaran Agro - Kelapa Gading

Dec 2024

Jakarta, Indonesia Information and Technology Intern

- Prepared employee master data and optimized internal workflows for seamless SAP integration.
- Validated SAP User-Defined Fields (UDFs) and provided technical troubleshooting to maintain accurate and reliable system operations.

Projects

Adaptive Human Pose AI | Python, PyTorch, Stable Diffusion, LoRA

- Architected a memory-efficient InstructPix2Pix generative AI pipeline leveraging LoRA and mixed-precision training to perform complex pose manipulation within strict consumer hardware compute constraints.
- Integrated ControlNet preprocessors to strictly maintain background consistency and subject identity during dramatic transformations

Lumos Production | React, Tailwind CSS, Laravel

- Developed a fast, responsive user interface and a custom Laravel CMS for a production company.
- Separated backend data logic from the frontend presentation (decoupled architecture) to optimize scalability and page load performance.

StartWithYou | React, Tailwind CSS, Laravel

- Engineered a streamlined, end-to-end event registration and ticketing web application with secure authentication and robust database architecture.
- Delivered a clean, responsive UI ensuring a frictionless booking experience across all mobile and desktop devices.

CareerScope – Computer Science Student Career Prediction Web Application

- Built a web platform to showcase a machine learning model that predicts computer science career paths based on interest, technical skills, and user-provided attributes
- Tech stack: React.js, Vite, Tailwind CSS

Autocare – Car Service Tracking Web Application

- Created a web app that enables users to track car service history and receive automated service reminders.
- Tech stack: HTML, CSS, JavaScript, Firebase

Skills & Interests

Technical:

- Languages: TypeScript, PHP, Python, C, Java, SQL
- Frontend & Mobile: React, React Native, Expo, Tailwind CSS, NativeWind, GSAP, Vite
- Backend & Cloud: Laravel, Supabase, PostgreSQL, MySQL, Vercel
- AI & Data: PyTorch, TensorFlow, Pandas, Hugging Face Diffusers

Language:

- Indonesia (Native)
- English (Fluent)
